PRIVATE TEEN PATTI · UI REDESIGN

Four directions. Pick one (or mix).

Each direction is a complete look and feel, with its own layout as well as its own colours. Every screen shows the same moment: a 6-player table on your turn (Classic, stake 20, you hold A-K-Q of spades), the winner screen after a show, and the lobby where the dealer picks the game. All mockups are at real phone-landscape size (844×390). Nothing about the rules or features changes.

A Maharaja

Royal Indian luxury: a private card room in a palace.

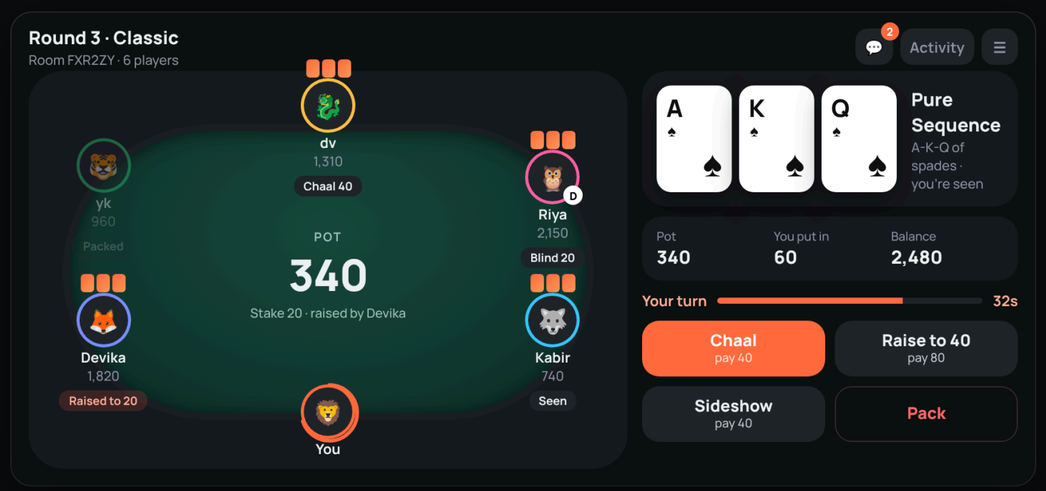

B Neon Noir

Late-night club energy: a glowing glass table in the dark.

C Clean Modern

Calm, clear, app-like: the iOS Game Center take on Teen Patti.

D Diwali Night

Festive Indian pop: rangoli, diyas and marigold. A party at home.

DIRECTION A

Maharaja

Royal Indian luxury: a private card room in a palace.

LOOK & FEEL

- Carved wood rim, emerald velvet felt, gold leaf
- Serif engraved type (Cinzel + Cormorant)
- Medallion avatars and brass name plaques
- Maroon and gold card backs with mandala pattern

LAYOUT

Full-width table. Your cards fan out big at the bottom centre, overlapping the rim; actions sit in a gold button column on the right.

MOTION & SOUND

Slow, weighty deals; cards slide from the dealer medallion; chips clink into a pile; a VICTORY banner with light rays.

STRENGTH

Feels premium and grown-up. Highest "wow" for a classic card game.

WATCH OUT

Ornate details need care to stay readable on small phones.

WINNER SCREEN

LOBBY: DEALER PICKS THE GAME

B

DIRECTION B

Neon Noir

Late-night club energy: a glowing glass table in the dark.

LOOK & FEEL

- Dark glass panels with cyan and magenta glow
- Techy type (Orbitron + Space Grotesk + mono numbers)
- HUD-style bottom bar like a console game
- Leaderboard-style results with a glitch WINNER title

LAYOUT

Wide stadium table on top. A bottom HUD holds your cards (left), the stake meter and timer (centre) and pill buttons (right).

MOTION & SOUND

Snappy, fast transitions; neon pulses on your turn; stake meter fills as raises happen; synth sounds.

STRENGTH

Most exciting and modern; great at night and in groups.

WATCH OUT

Can feel less "Indian card game", and glow can be busy.

TABLE: YOUR TURN

WINNER SCREEN

LOBBY: DEALER PICKS THE GAME

DIRECTION C

Clean Modern

Calm, clear, app-like: the iOS Game Center take on Teen Patti.

LOOK & FEEL

- Flat graphite panels, soft rounded shapes
- One warm accent (coral) for the main action
- Big readable type (Manrope), colour avatar rings
- Info cards: pot, what you put in, balance

LAYOUT

Split screen: the table on the left, your own control panel on the right (cards, numbers, 2×2 buttons). Closest to today's app, but far cleaner.

MOTION & SOUND

Subtle springs, smooth fades, haptic taps; nothing flashy.

STRENGTH

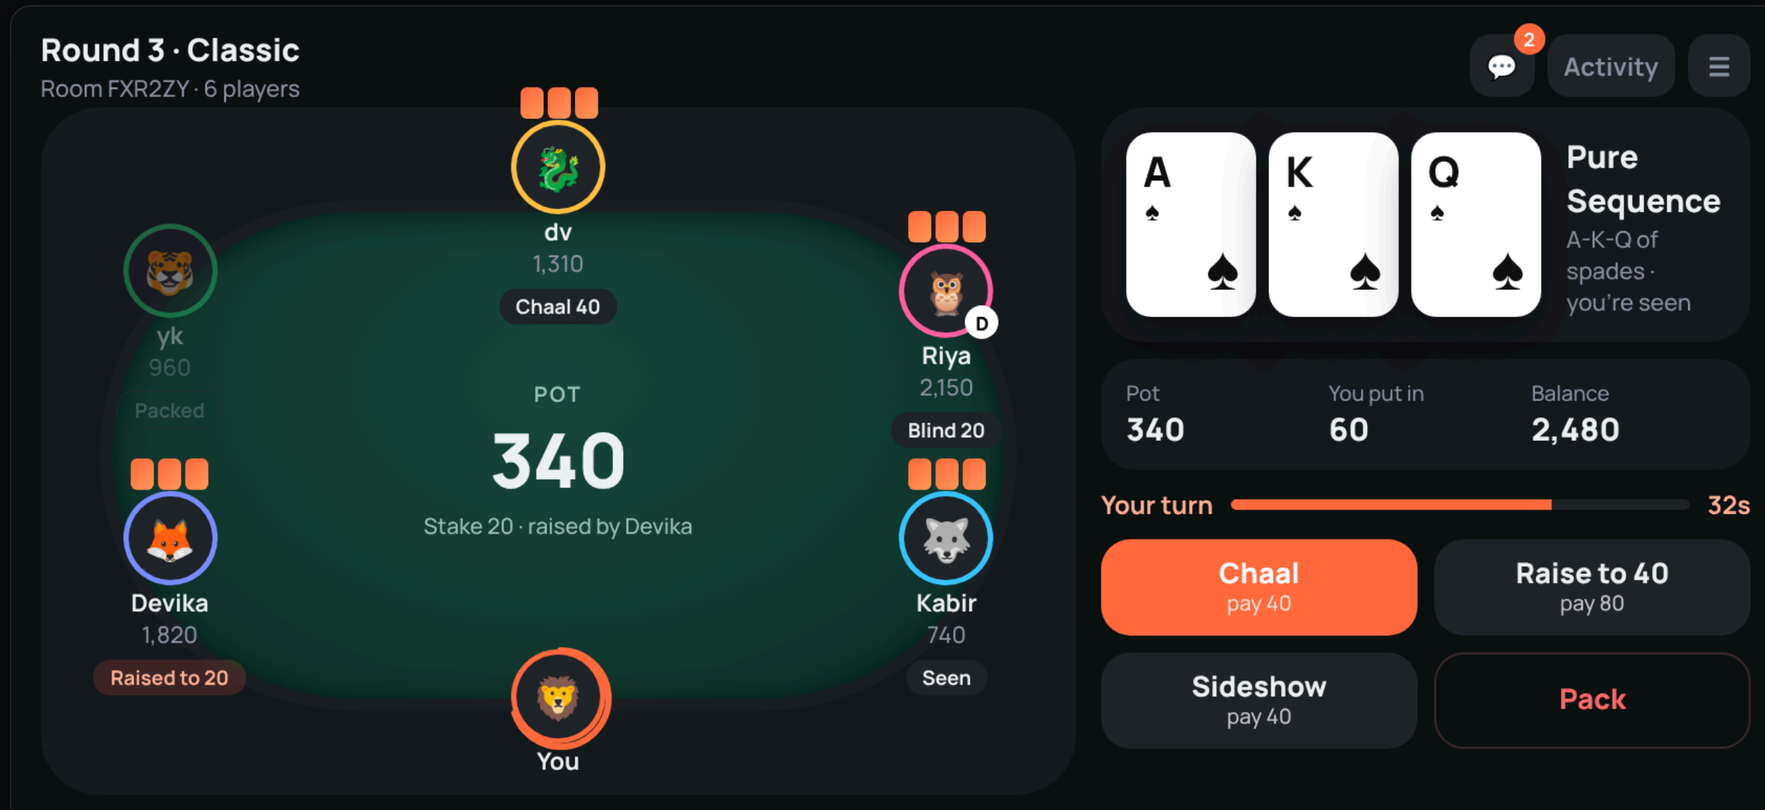

Easiest to read and play; works for everyone, any lighting.

WATCH OUT

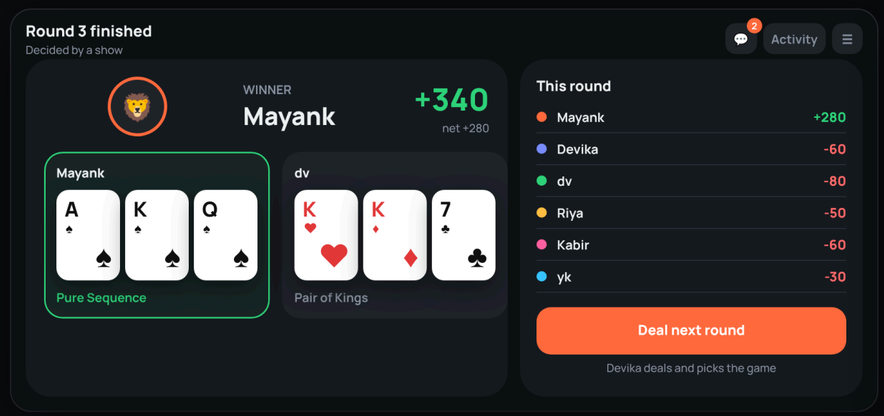

Least dramatic; needs good animations to feel exciting.

DIRECTION D

Diwali Night

Festive Indian pop: rangoli, diyas and marigold. A party at home.

LOOK & FEEL

- Rangoli-pattern table rim with glowing diya lights
- Indigo night sky, hanging lanterns, fireworks on wins
- Playful type (Yatra One + Baloo 2), Hinglish copy
- Chunky 3D candy buttons like popular mobile card games

LAYOUT

Full table with your cards big at the bottom; a stake card bottom-left, your timer beside your cards, and big candy buttons bottom-right.

MOTION & SOUND

Bouncy and celebratory: firework bursts, confetti, coin showers, playful sounds.

STRENGTH

Most fun and most "ours"; perfect for friends and festivals.

WATCH OUT

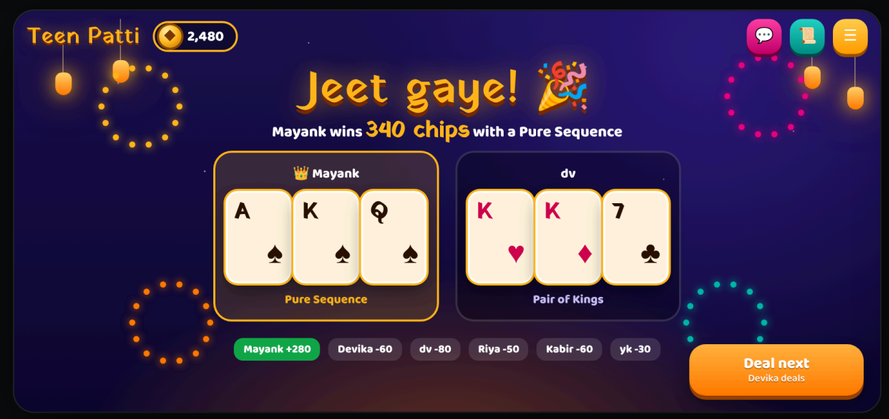

Very loud visually; the Hinglish tone isn't for everyone.

HOW TO CHOOSE

Tell me a letter, or mix and match.

A Maharaja

Feels premium and grown-up. Highest "wow" for a classic card game.

Ornate details need care to stay readable on small phones.

B Neon Noir

Most exciting and modern; great at night and in groups.

Can feel less "Indian card game", and glow can be busy.

C Clean Modern

Easiest to read and play; works for everyone, any lighting.

Least dramatic; needs good animations to feel exciting.

D Diwali Night

Most fun and most "ours"; perfect for friends and festivals.

Very loud visually; the Hinglish tone isn't for everyone.

EXAMPLES OF MIXES

- **A + C**: Maharaja's table and cards with Clean Modern's clear control panel (premium but easy to read).
- **D + C**: Diwali colours and celebrations, Clean Modern layout and type (festive without the noise).
- **B for night, C for day**: theme switch in the menu (we already have table themes).
- Any direction can keep the Hindi/Hinglish touches ("Jeet gaye!", "Patte baanto") or stay in English.

WHATEVER YOU PICK, THESE STAY

Landscape-first layout, dealer picks the game, joker picking, the sideshow prompt, all-in and side pots, buy-ins and profit, chat, sounds and the activity feed. The redesign changes how it looks and feels, not how it plays.
